

Portrait

A new AMINO has emerged with the completion of a leveraged management buyout of the amino acids business of AMINO GmbH.

AMINO GmbH, headquartered in Frellstedt, Germany, is a fully integrated producer of amino acids and other value-added ingredients with natural biological origins. The company is dedicated to high-quality production practices, applying strict quality assurance standards and state-of-the-art technologies during the extraction and purification of active pharmaceutical-grade and nutritional compounds. AMINO products derived vegetable sources or manufactured by fermentation, are produced according to international GMP standards

The production program of AMINO vary from *bulk pharmaceutical, chemicals and active ingredients to health food.*

With the global distribution network the sales of AMINO's products occur all over the world with major markets in Europe, North America and the Far East.
